## AVCON® NAMED ONE OF INC. 500'S FASTEST GROWING COMPANIES

**LAKEWOOD, NJ, OCTOBER 15, 2007:** AVCON®, a leading manufacturer of structural thermoplastic and powder coated aluminum railing systems today announced that it has been included in the inaugural Inc. 5000 list of the *Fastest Growing Companies in America*. AVCON® was ranked number **3088** due to its rapid growth over the past three years.

"This is AVCON's first year being included in any type of 'fastest growing' competition and we are extremely excited" said Klint Stanley, President of AVCON®. "AVCON is based on a group of amazing team members that service a loyal customer base that we are happy to serve. It is to all of them that AVCON's success can be attributed. It is because of them that our future growth prospects are through the roof. We look forward to moving up on the Inc 5000 list next year."

**Why it's growing:** A growing understanding that structural plastic railings are as safe as --- and more maintenance-free than --- metal handrails has led to increased demand for AVCON's products. Additionally, the expansion of AVCON's unique Thermoplastic technology to include other products, i.e. Perma-Cap® Bleacher Seat Covers and Equi-Safe® Equestrian Fencing has added greatly to the markets serviced by AVCON®.

**What's noteworthy:** AVCON® has worked with major amusement parks, stadiums and hotels around the U.S., Bahamas and Hong Kong.

Founded in 1991, AVCON® has utilized the most advanced thermoplastic technologies, creating maintenance-free sustainable building product solutions that exceed all major national building codes. These unique products have been specially formulated to withstand the damaging effects of salt, chemicals, ultra-violet light, abuse and other site conditions.

Complete information on this year's Inc. 5,000, can be found at [www.inc.com/inc5000](http://www.inc.com/inc5000). The list features a profile for each company, almost all of them written as a result of *Inc.* interviews with management. In addition, the list is searchable according to numerous criteria, including industry, city, state, region, and year founded.
